Work experience

Nokia

March 2020 - September 2020

Fullstack Working Student with DevOps

- Developing web application based on existing code base. Application is used to collect funds for charitable foundation. Frontend is written in React, backend is created with Node.js with framework Express.js. In this application I was working on every aspect, from responsive design to integration with payment providers using handwrote REST API. DevOps consisted of creating docker configs, manage external server, manage Gitlab CI/CD.

Skills

- TypeScript, JavaScript, Node
- Docker, Docker Compose, Bash
- React, HTML, SCSS/styled-components
- Jest, React Testing Library, mocha, chai
- REST, Web Sockets
- MySQL, MongoDB
- Git, Gitlab CI/CD
- Familiar with basic maintenance and configuration of unix-like operating systems
- Polish (native), English (fluent)
- Code review, proactivity, fluent communication

Hobby projects

- [Question and Answers application - React and Node.js](#)
- [Weather forecast application - React with OpenWeatherMap API](#)
- [Portfolio \(outdated, update in progress\)](#)

Education

ZSiPO in Nysa (IT technical college)

2015 - 2019
